REVIEWER INDEX

to Volume 122, May–August, 1989

Below is a list of the people who reviewed manuscripts for GENETICS during the preparation of Volume 122. The aim of GENETICS is to communicate significant research. To succeed, we must recognize what is significant; making sure the presentation is accurate, unambiguous and easily readable. For this, we depend heavily on our reviewers, who perform this indispensable service without reward. The quality of the journal strongly reflects the quality of their efforts. We apologize to any reviewer whose name has been inadvertently omitted, and we are sincerely grateful to all.
